GAS FURNACES

MAKE THE EASY CHOICE  
AND GET INSTANT WARMTH.

## COMFORT ISN'T COMPLICATED WITH DUCANE.™

When it's time to choose a furnace, you don't want a complex decision. You want something that's rugged, well built, and sensible. You don't want to wait. And you want to know you're making a smart decision. With Ducane, you never have to worry. Because it's always the right choice.

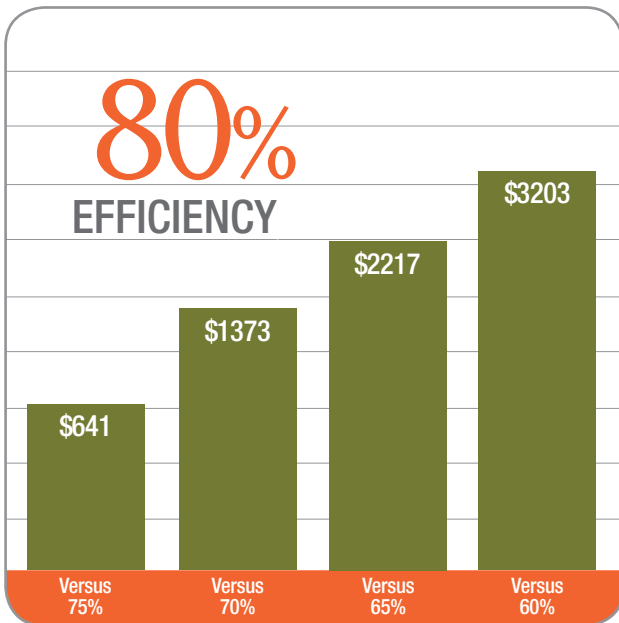

## SOME DECISIONS ARE TOUGH. THIS ONE ISN'T.

When you consider Ducane systems, quality and value are givens. You're getting peace of mind with great features and smart designs that squeeze more efficiency out of every energy dollar. And best of all, you get it right now.

### Variable speed offers more consistent temperatures.

The variable speed blower found in the 80G2V accelerates slowly during startup, reducing noise and helping to control humidity. Variable speed also allows your furnace to preheat the air in the winter and precool it in the summer, making the air more comfortable as it begins to circulate. And since it can move air steadily and gently, a variable speed furnace can eliminate hot and cold spots throughout your home.

### Over the years, a hardworking Ducane furnace can save you hundreds of dollars on utility bills.

Savings vary depending on use, geography, lifestyle, maintenance, installation and other factors. Chart depicts 5-year savings over less-efficient models.

### Two-stage heating keeps you comfortable and efficient.

With two stages of heat, the 80G2V can adapt to changing conditions inside and outside your home. Since it operates at a lower heat output most of the time, only ramping up to its higher stage during periods of extreme demand, your home stays warm and energy efficient.

## THE 80G2V IS BUILT WITH SMART IDEAS THROUGHOUT.

- An 80% Annual Fuel Utilization Efficiency (AFUE)\* means 80% of your fuel is converted into usable heat
- An efficient ECM™ variable speed blower reduces operating noise while helping to deliver more consistent comfort throughout your home
- Two-stage heating lets your furnace adjust its heat output based on conditions inside and outside your home, using energy efficiently
- The robust aluminized steel heat exchanger is crimped, not welded, for long life and safety
- A 10-year limited warranty on parts and a limited lifetime warranty on the heat exchanger (with registration)\*\* mean you'll enjoy peace of mind with your comfort

*\*Like the miles-per-gallon rating on your automobile, the higher the AFUE rating, the lower your fuel costs. All furnaces manufactured today must meet minimum AFUE requirements. If your furnace is 10–15 years old, it probably falls below the current minimum and wastes energy.*

*\*\*Applies to residential applications only. For terms, restrictions and exclusions, see full warranty at [alliedair.com](http://alliedair.com).*

## DUCANE™ - THE DECISION YOU'LL CELEBRATE.

When you think about everything Ducane delivers, your decision is no decision at all. Ducane is always ready to keep you comfortable. The performance and reliability you want are right here, and ready to go to work.
